

Michelangelo USB

DESCRIPTION

The external ADSL modem for USB port.

The ADSL and USB technologies together to get the maximum performance.

Michelangelo USB is an ADSL modem up to 8Mbps to be connected to the USB port of your computer.

Using the ADSL accounts (640Kbps), supplied by the Internet Providers, you will be able to surf the Internet 10 times faster than connecting with an ISDN or analog modem.

With the ADSL modems you will be always on-line: the Internet connection is active and the telephone line always free for faxes and calls.

You will be able to download images, video, audio files in a few seconds, saving money as the subscriber's fee doesn't depend on connection time and on data traffic.

Thanks to the Windows® Plug & Play function and to the setup utility, supplied into the package, Michelangelo USB is very easy to install and setup.

Furthermore it is software upgradable.
It is supplied with drivers for Windows® 2000/ME/98.

Code: 8E4086

- **ADSL modem up to 8Mbps**
- **Powered by the USB port**
- **Asymmetric data speed**
- **Downstream up to 8Mbps**
- **Upstream up to 1Mbps**
- **8 Mbps full rate ADSL support**
- **1.5 Mbps G.Lite ADSL support**
- **ADSL standards:**
 - ANSI T1.413
 - ITU G.992.1 (G.dmt)
